Data Source: North Carolina State Center for Health Statistics, Vital Statistics Death Certificate Data.

Note: Deaths included are limited to North Carolina Residents. Acute causes of alcohol attributable deaths, including injuries, take place in the short-term. Figures are calculated using Alcohol-Related Disease Impact (ARDI) methodology from the CDC, which provides estimates of alcohol related harms. Estimates have been rounded to the nearest whole number; this may result in a slight difference in the 'Total' column due to rounding. These causes of death include 19 alcohol-related injuries (ex: poisonings, falls, homicide, suicide). For more information, please visit [https://nccd.cdc.gov/DPH\\_ARDI/Info/Methods.aspx](https://nccd.cdc.gov/DPH_ARDI/Info/Methods.aspx).
