

# SURVEILLANCE UPDATE

## Child School Absenteeism Due to Injury: 2010 Child Health Assessment & Monitoring Program (CHAMP)

Percentage of N.C. parents who reported their child missed one of more school days within past year due to injury, by child gender: N.C. CHAMP 2010

Percentage of N.C. parents who reported their child missed one of more school days within past year due to injury, by child age group: N.C. CHAMP 2010

Percentage of N.C. parents who reported their child missed one of more school days within past year due to injury, by parent educational attainment: N.C. CHAMP 2010

Percentage of N.C. parents who reported their child missed one of more school days within past year due to injury, by child race/ethnicity: N.C. CHAMP 2010

The North Carolina Child Health Assessment and Monitoring Program (NC CHAMP) is a surveillance system that collects information about the health characteristics of children from age 0 to 17 years. NC CHAMP is a follow-up survey of the Behavioral Risk Factor Surveillance System (BRFSS) telephone survey of adults, ages 18 and older. All adult respondents with children living in their household are invited to participate in the CHAMP survey. One child is randomly selected from the household and the adult most knowledgeable about the health of the selected child is interviewed in a follow-up survey. This surveillance update includes data collected in 2010 on 1,339 parental surveys of children enrolled in public or private school. Results presented here are for parents who reported their child missed school for one day or more due to injury. Percentages are weighted to population characteristics. For further information about NC CHAMP, including specific data on 95 percent confidence intervals, please visit [www.schs.state.nc.us/SCHS/champ](http://www.schs.state.nc.us/SCHS/champ) or contact [CHAMPstaff@dhhs.nc.gov](mailto:CHAMPstaff@dhhs.nc.gov).
