

VIOLENT DEATHS AMONG NON-HISPANIC AFRICAN AMERICANS IN NORTH CAROLINA: 2006-2015

The North Carolina Violent Death Reporting System (NC-VDRS) is a CDC-funded statewide surveillance system that collects detailed information on deaths that occur in North Carolina resulting from violence: homicide, suicide, unintentional firearm deaths, legal intervention and deaths for which intent could not be determined. NC-VDRS is a multi-source system that gathers information from death certificates, medical examiner reports and law enforcement reports. The goal of this system is to aid researchers, legislators, and community interest groups in the development of public health prevention strategies to reduce violent deaths. NC-VDRS began collecting data in January 2004. This document summarizes all deaths from violence among non-Hispanic (NH) African American residents for the years 2006-2015.

North Carolina Violent Death Reporting System

Violent Death Rate by Race: NC-VDRS, 2006-2015

~ N.C. Division of Public Health - N.C. Violent Death Reporting System ~

* Non-Hispanic
