

SURVEILLANCE UPDATE

Child spanking in past month: 2010 Child Health Assessment & Monitoring Program (CHAMP)

Percentage of N.C. parents who reported that in the past month their child had been spanked on his/her bottom with a bare hand, by child gender: N.C. CHAMP 2010

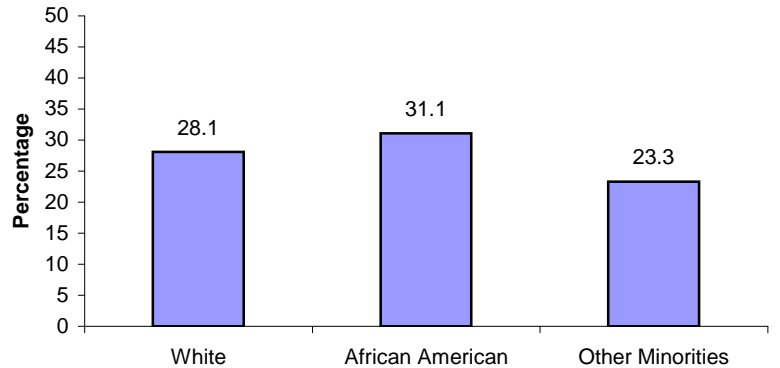

Percentage of N.C. parents who reported that in the past month their child had been spanked on his/her bottom with a bare hand, by child age group: N.C. CHAMP 2010

Percentage of N.C. parents who reported that in the past month their child had been spanked on his/her bottom with a bare hand, by parent educational attainment: N.C. CHAMP 2010

Percentage of N.C. parents who reported that in the past month their child had been spanked on his/her bottom with a bare hand, by child race/ethnicity: N.C. CHAMP 2010

The North Carolina Child Health Assessment and Monitoring Program (NC CHAMP) is a surveillance system that collects information about the health characteristics of children from age 0 to 17 years. NC CHAMP is a follow-up survey of the Behavioral Risk Factor Surveillance System (BRFSS) telephone survey of adults, ages 18 and older. All adult respondents with children living in their household are invited to participate in the CHAMP survey. One child is randomly selected from the household and the adult most knowledgeable about the health of the selected child is interviewed in a follow-up survey. This surveillance update includes data collected in 2010 on 999 parental surveys of children ages 3 to 12 years. Results presented here are for parents who reported spanking their child on bottom with bare hand. Percentages are weighted to population characteristics. For further information about NC CHAMP, including specific data on 95 percent confidence intervals, please visit www.schs.state.nc.us/SCHS/champ or contact CHAMPstaff@dhhs.nc.gov.
