Opioid Overdose Reversals with Naloxone Reported to the North Carolina Harm Reduction Coalition, 8/1/2013-7/31/2018

11,472 community reversals reported

Source: North Carolina Harm Reduction Coalition (NCHRC), August 2018
Analysis by Injury Epidemiology and Surveillance Unit
Opioid Overdose Reversals with Naloxone Reported to the North Carolina Harm Reduction Coalition, 8/1/2013-7/31/2018

11,472 community reversals reported*

*39 reversals in an unknown location in North Carolina and 245 reversals using NCHRC kits in other states reported to NCHRC

Source: North Carolina Harm Reduction Coalition (NCHRC), August 2018
Analysis by Injury Epidemiology and Surveillance Unit
Last month, **12%** of reversals where dosage amount was reported (N=67) used **3 or more doses** of naloxone.

*Percentage based on reversals with known dosage amount. Use caution when interpreting this data as a large percentage of each months’ reversals had unknown dosage amounts.*
