**Opioid Overdose ED Visits by Race Ethnicity\***

\*Non-hispanic, **except** when ethnicity data are missing; if ethnicity is missing race categories include both Hispanic and Non-Hispanic. AI/AN (American Indian/Alaskan Native).

**Note:** NC DETECT is North Carolina's statewide syndromic surveillance system. There may be data quality issues affecting our counts: counties with <10 cases may not be true lack of opioid overdose cases but data quality issues; additionally, some hospitals use non-specific poisoning codes rather than specific opioid poisoning codes. Counts based on ICD-10-CM diagnosis code of an opioid overdose: **T40.0** (Opium), **T40.1** (Heroin), **T40.2** (Other Opioids), **T40.3** (Methadone), and **T40.4** (Other Synthetic Narcotics), and **T40.6** (Other and Unspecified Narcotics).
